Capabilities Statement

Sprague Structural Solutions is a local family-owned business. We have been in business since 2019 and provided expert services to numerous commercial customers, including Cushman and Wakefield, McWhinney, and Colorado State University. Our company strives to be the best through weekly job-specific training, out-of-state training hosted by our supplier, and weekly One Team meetings where our entire company meets to discuss upcoming projects, lessons learned, and best practices. Being a small business of less than 20 employees, we can get things done quickly and provide a custom solution to every customer.

Lift settled slabs and slab foundations. Lift and level sunken sidewalks. Strengthen and stabilize loose soil. Fill sinkholes and other voids. Lift, level, and stabilize roadways and airport runways. Repair and stabilize rail beds weakened by soil washouts. Treat soil to improve load-bearing characteristics in preconstruction applications.

Our mission is to treat every customer like family. We believe in listening to our customer's objectives and achieving them together through clear communication. We live by these values each day and strive to provide the most enjoyable experience for every customer.

Core Competencies

- Concrete Lifting and Leveling
- Concrete Surface Sealing
- Concrete Crack Repair
- Concrete Joint Sealant

Differentiators

Sprague Structural Solutions is a Native family-owned Colorado business. We are a smaller company of 15 employees. Our company does continuous training on our products and services. We currently have a fleet of 3 rigs. We also have a 5500 sqft warehouse that is stocked with products at all times. Sprague has been in business since 2019 and has done many commercial jobs. This means we have the ability to quote and install jobs efficiently and in a reasonable time frame.
